

Snohomish Health District **2018 DATA WALK**

Share your wisdom and voice at one of two community “Data Walks” which will center on the perspectives of Snohomish County community members.

We'll focus on the following eight key issues:

- Youth mental health
- Suicide
- Children’s dental health
- Opioid misuse
- Primary care provider access
- Housing/Vacancy/Homelessness
- American Indian disparities
- Youth obesity

Participants will be guided through a data analysis process. Your input, and the conversations that happen in small groups, help to better understand health issues.

The data walks and your contributions are vital as we move forward into community health improvement planning in 2019.

To RSVP for either event:

Email:
sdejong@snohd.org
